

Relative abundance of taxa for 12S–Eukaryota in mock communities

The heatmap displays the distribution of the 'SEX' variable across different demographic groups. The color intensity represents the proportion of individuals in each group. The visualization shows that the majority of the population is female, with a higher proportion of males in certain age groups like 18-24 and 25-34.

Species

Rhopalosiphum padi -

Diuraphis noxia -

Myzus persicae -

Metopolophium spp. -

Aphis aurantii/craccivora -

Acizzia spp. -

Rhopalosiphum spp. -

Metopolophium dirhodum -

Bactericera cockerelli -

Rhopalosiphum nymphaeae/padi -

Acizzia alternata -

Acizzia solanicola -

Simulium spp. -

Psychomora spp. -
